

Committee Real Estate

The committee seeks to enhance and disseminate knowledge about real estate as an investment category within CFA Society VBA Netherlands. It also strives to improve the understanding of financial markets within the real estate industry. In short, it acts as a bridge of knowledge between these two worlds of specialists. The committee members have diverse profiles with various backgrounds and expertise, particularly in real estate. Active committee discussions from different real estate perspectives are encouraged and often serve as the direct impetus for organizing events, seminars, and roundtable meetings.

Areas of focus include promoting professionalism and transparency, as well as developing knowledge of real estate as an investment category and of the various (in)direct investment forms. Key topics in this regard are the trends and risk/return profiles within the different sectors of the real estate market, the strategic importance of real estate and the themes of sustainability/impact. The committee is devoted to exchanging knowledge and information with interest groups such as VOGON, INREV, EPRA, IVBN, NAREIT, OPF, PVK and NCREIF.
