# Joe Hanmer

## Global Head of Quant

**Joe Hanmer**

**Based in:** London

**Investment Experience:**
**10** years

**Education:**
MMath&Phys joint honours, University of Manchester

CFA Charterholder

Investment Management Certificate

**Joe Hanmer** is the Global Head of Quant at Fidelity, responsible for the quantitative research function that develops systematic investment strategies and provides a wide range of quantitative tools/insights to the investment team. The team delivers tactical models across Fixed Income, Equities and Multi-asset departments working closely with both the systematic and the discretionary portfolio managers as well as longer term quantitative solutions through a range of retirement and strategic models.

Joe joined Fidelity in 2011 through our graduate programme. After 2 years working across different investment disciplines including financial credit research, quantitative research and financials/corporate trading he joined the quantitative research team.

Joe specialises in fixed income and has a strong track record creating proprietary models that aid the portfolio management process in beta management, credit selection and bond relative value. Joe has also conducted pioneering work in the areas of ESG, smart beta and factor investing applied to fixed income markets.
